

COVID - 19

Last Updated: March 20, 2020

The health and safety of our employees and passengers remains our top priority during this unprecedented time. Air Canada has advised us of temporary suspension of service out of Kamloops Airport. We are expecting fewer frequencies from WestJet and continue to monitor this rapidly-evolving situation. Kamloops Airport will remain open to serve its region as a critical piece of community infrastructure.

Kamloops Airport is supporting public health practices with additional measures that include:

- Increased frequency of cleaning and disinfection in high-traffic areas
- Hand sanitizer stations located throughout the terminal
