

MEDIA RELEASE**April 23, 2025**

Kamloops Airport announces traveler numbers for Q1 2025, compared to the same period from the previous year.

	2024	2025	Change
Q1 Travelers	89,588	78,571	- 12.3%
January	30,028	27,597	- 8.1%
February	30,079	24,942	- 17.1%
March	29,481	26,032	- 11.7%

The decreases experienced in the first quarter of 2025 can be attributed largely to the reduction in capacity resulting from fewer flight frequencies to Calgary and Vancouver compared to Q1 2024. Although flights are operating at or near capacity on all routes, the current frequency reductions are expected to remain in the near term, with pre-pandemic services to Calgary returning in May.

We are encouraged by the continued success of Pacific Coastal and its contribution to regional connectivity. Kamloops Airport Ltd. remains committed to collaborating with all airline partners to enhance the travel experience to and from Kamloops and the surrounding area for locals and visitors. Kamloops Airport Ltd. (KAL) is a member of Vantage Group.
