

MEDIA RELEASE

July 17, 2025

Kamloops Airport announces traveler numbers for Q2 2025, compared to the same period from the previous year.

	2024	2025	Change
Q2 Travelers	73,721	65,971	- 10.5%
April	26,074	21,168	- 18.8%
May	24,174	22,098	- 8.6%
June	23,473	22,705	- 3.3%

The decrease observed in Q2 is primarily due to reduced flight frequencies to both Calgary and Vancouver. While pre-pandemic service levels between Calgary and Kamloops resumed in May, flights to Vancouver continue to operate at a reduced frequency. Furthermore, ongoing geopolitical factors have impacted transborder travel, further contributing to the overall decline.

We are encouraged by WestJet's recent announcement of a new nonstop route to Edmonton, operating twice weekly. As always, Kamloops Airport remains committed to working with all airline partners and communities to enhance the travel experience for both residents and visitors. Kamloops Airport Ltd. (KAL) is a proud member of the Vantage Group.
