

MEDIA RELEASE

January 28, 2025

Kamloops Airport announces the 2024 Q4 and Year-End passenger statistics, as compared to the same period from the previous year.

	2023	2024	Change
Q4 Travelers	84,218	76,560	-9.1%
October	25,971	26,228	+1.0%
November	27,406	23,905	-12.8%
December	30,841	26,427	-14.3%
Year-End	311,696	310,507	-0.4%

The decreases experienced in Q4 of 2024 can be attributed largely to the reduction in capacity resulting from flight frequency reductions to Calgary and Vancouver as compared to Q4 in 2023. Although flights are operating at or near capacity on all routes, the current frequency reductions are expected to remain in the near term with pre-pandemic services to Calgary returning in the spring.

To rebuild traveler numbers to pre-pandemic levels, Kamloops Airport Ltd. is working closely with our business and tourism industry partners on destination development opportunities to bring more visitors to the region. We remain optimistic these efforts will support growth to pre-pandemic levels as we work with our stakeholders in the airline, tourism, and business sectors to amplify Kamloops and the surrounding area as a destination for both tourism and commerce.
